

CARAT CAPITAL.

THE TRADE PAPER OF THE JEWELRY WORLD

HOW TO USE THIS BOOK

Contents

This book sets out how the Carat Capital mark is drawn and how to use it. Every file it refers to is in `brand/logo`.

When a case isn't covered here, choose the simpler option and keep the point red.

THE IDEA

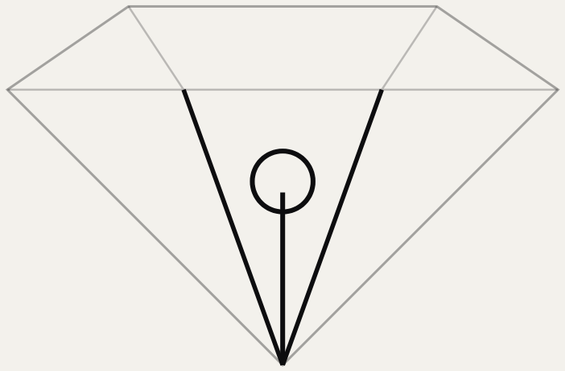

A diamond that is also a pen

Printers set type in points. Dealers weigh diamonds in points: one point is a hundredth of a carat. The mark sits where the two trades meet.

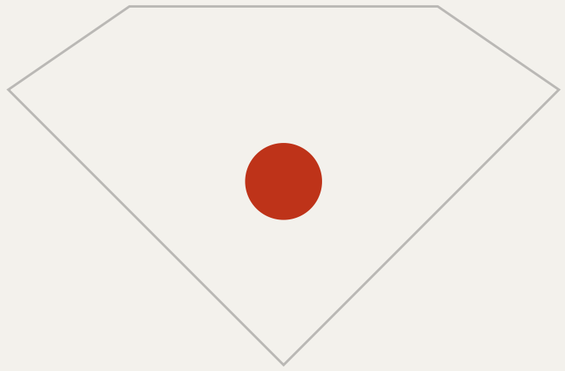

The stone

A round brilliant seen from the side. The crown is cut at 34.5°, the angle Marcel Tolkowsky published in *Diamond Design* in 1919.

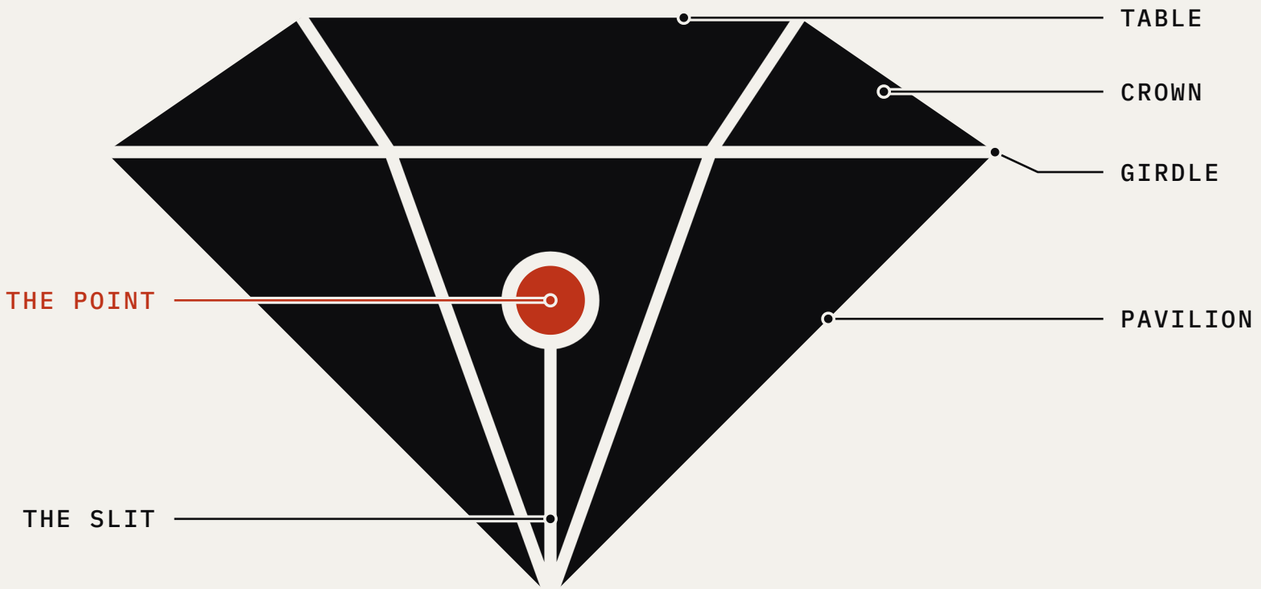

The pen

Its pavilion is a nib. The slit runs down the centre facet, and the two pavilion mains become the tines.

The point

The nib’s breather hole holds a red point. The same point closes the name, so the symbol and the wordmark end on one mark.

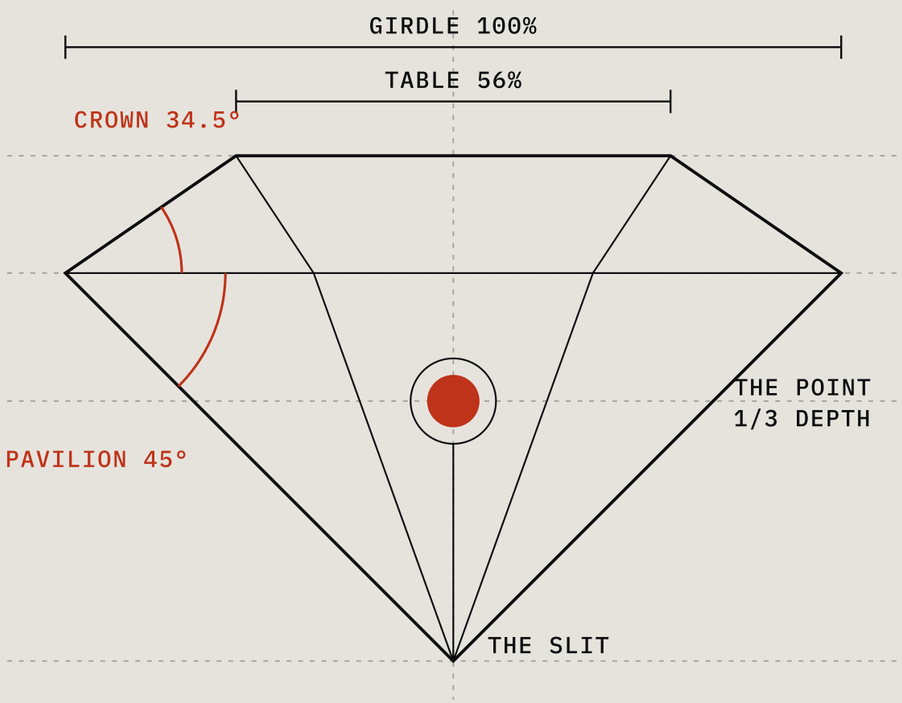

THE SYMBOL

Six parts, all from the stone

Every line in the mark is a facet edge or the slit of a nib. Nothing is there for decoration, which is why it holds together at every size.

> The symbol is always drawn with the table up and the point red. It never sits in a circle, badge or frame.

CONSTRUCTION

Drawn to a cutter’s figures

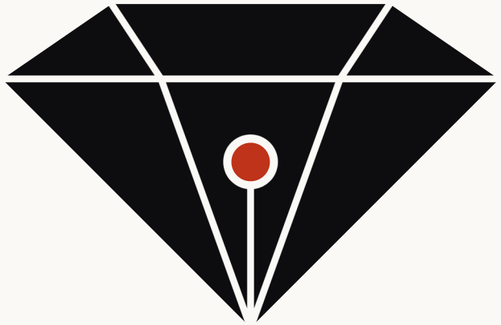

GIRDLE	1.000 (the unit)
TABLE	0.56 of the girdle
CROWN ANGLE	34.5°
CROWN HEIGHT	0.151
PAVILION ANGLE	45°
PAVILION DEPTH	0.500
OVERALL HEIGHT	0.651
FACET BREAK	0.36 of the half-girdle
THE POINT	a third of the way down the pavilion
KNOCKOUT, L CUT	1.4% of the width

> The pavilion runs deeper than an ideal cut (45° against 40.75°). That extra depth is what lets the stone read as a nib.

OPTICAL SIZES

Three cuts for three distances

Fine knockouts disappear on small screens, so the mark comes in three cuts. Each keeps the silhouette and the point and drops detail as it shrinks.

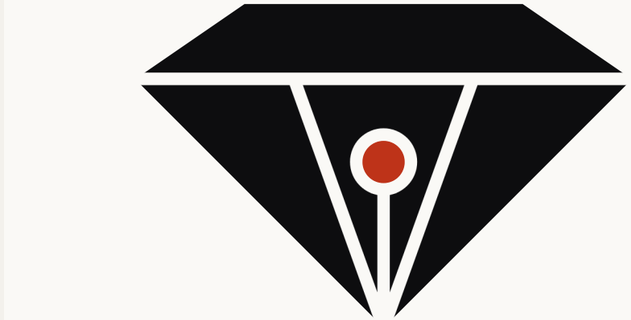

L cut

96 PX AND UP · 25 MM AND UP

All facets. The master drawing.

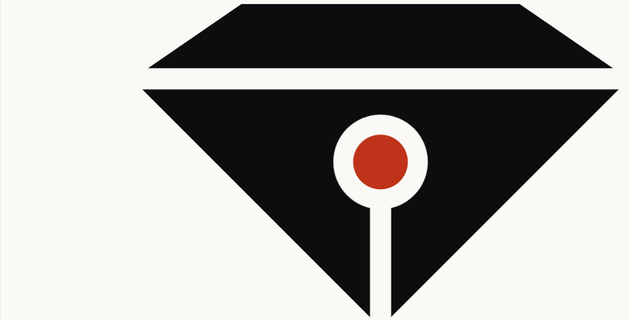

M cut

32–96 PX · 9–25 MM

Crown facets removed, knockouts doubled.

S cut

16–32 PX · UNDER 9 MM

Girdle, slit and point only. Favicons and app bars.

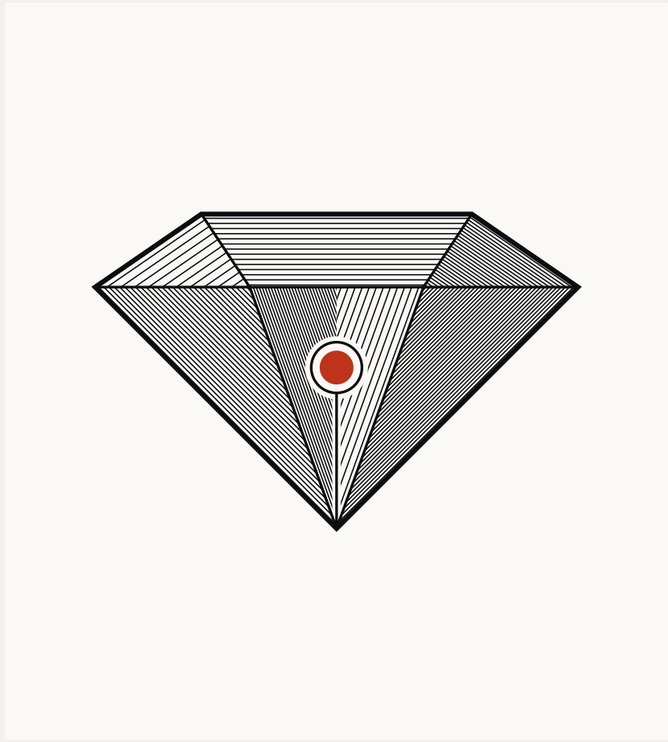

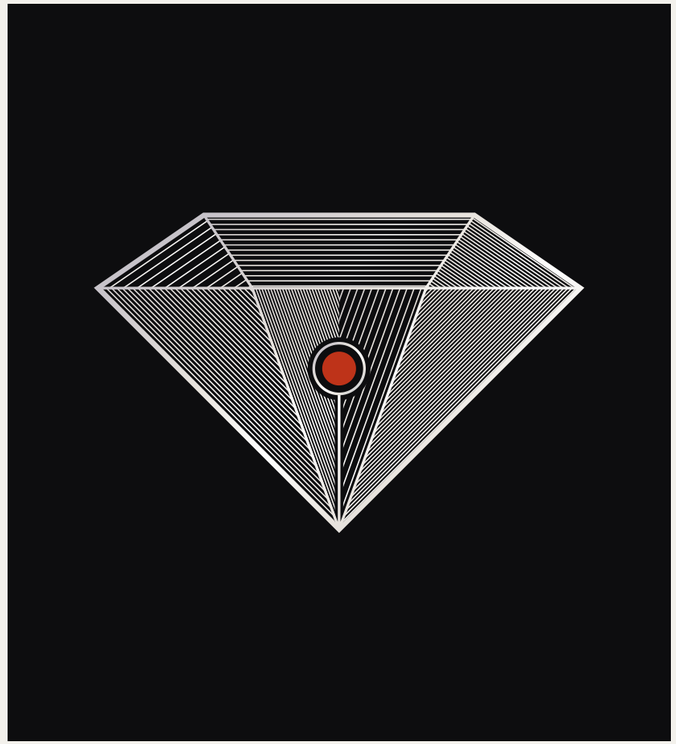

THE ENGRAVED CUT

For print that invites a closer look

Each facet is hatched at its own angle and density, lit from the upper left, so the stone reads in pure line. Use it on certificates, the Almanac cover, foil and blind stamping, and letterpress.

> Use it at 40 mm or 400 px and larger. Below that, use the L cut.

THE WORDMARK

Instrument Sans Bold, and one red point

The name is set in Instrument Sans Bold capitals, the face the paper's nameplate has always used. The full stop is drawn as the point.

Display cut

Tracking −20, word space +0.06 em. For every lockup and the masthead, at a cap height of 24 px or 6 mm and up.

Text cut

Tracking 0, word space +0.06 em. A little more air for small sizes, navigation bars and live web text. **CARAT CAPITAL.**

Artwork, not type

Use the files; don't retype the name. The website is the one exception: it sets the name live in Instrument Sans Bold and draws the point in CSS to the same measurements.

LOCKUPS

Five arrangements

The horizontal lockup is the default. Choose another only when the space asks for it.

PRIMARY · HORIZONTAL WITH TAGLINE
Mastheads, covers, the share card, anything with room.

HORIZONTAL, NO TAGLINE
Headers and bars under 300 px wide.

STACKED
Square and portrait formats, social cards, posters.

WORDMARK
Where the symbol already appears nearby.

SYMBOL
Favicons, avatars, app icons, stamps.

CLEAR SPACE AND MINIMUM SIZE

Give it one cap height

Keep everything else at least **x** away from the lockup on every side, where **x** is the cap height of the C.

LOCKUP WITH TAGLINE	180 px · 45 mm wide
LOCKUP, NO TAGLINE	120 px · 30 mm
STACKED LOCKUP	100 px · 25 mm
WORDMARK	90 px · 22 mm
SYMBOL, S CUT	16 px · 5 mm

> Below 180 px the tagline stops being legible, so drop it rather than shrink it.

COLOUR

Black, Pearl White, and the point

Two colours carry the brand: Black for the mark and the type, Pearl White for the ground. Point Red is kept for the point and the paper's red accents; it never becomes a background for long text.

Black

Brand colour · the mark, text

HEX	#0D0D0F
RGB	13 13 15
CMYK*	13 13 0 94

Pearl White

Brand colour · the ground

HEX	#F3F1EC
RGB	243 241 236
CMYK*	0 1 3 5

Point Red

The point only

HEX	#BE3319
RGB	190 51 25
CMYK*	0 73 87 25

Pearl Lustre

Foil, hallmarks

HEX	#E9E4DE
RGB	233 228 222
CMYK*	0 2 5 9

Black 2

Secondary text

HEX	#3A3A3F
RGB	58 58 63
CMYK*	8 8 0 75

Black 3

Captions, rules

HEX	#6E6D74
RGB	110 109 116
CMYK*	5 6 0 55

Pearl Low

Plates, panels

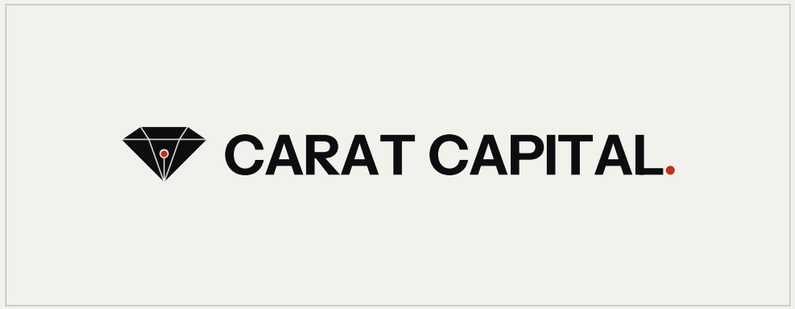

HEX	#E6E3DD
RGB	230 227 221
CMYK*	0 1 4 10

* CMYK values are converted from RGB as a starting point. Ask the printer for a proof, and match it to the swatches in this book.

COLOUR IN USE

Six approved pairings

The point stays red in every pairing but one: one-colour work, where it takes the colour of the mark.

Primary. Black and Point Red on Pearl White

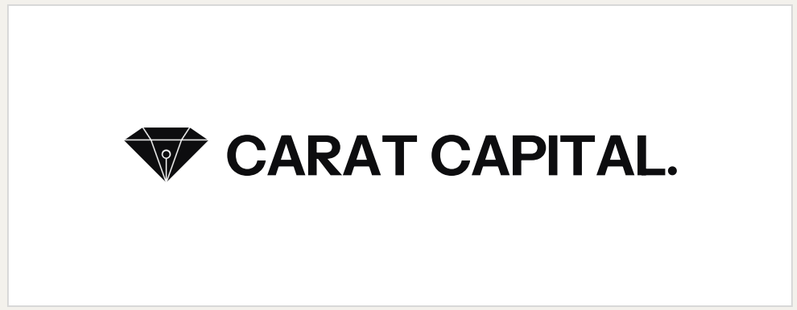

Reverse. Pearl White and Point Red on Black

Foil. Pearl lustre on Black, the point in red foil

On Point Red. Pearl White, with the point in Black

One colour. Black only, for faxes, engraving, embossing

One colour, reversed. Pearl White only, on dark images with a plate

TYPOGRAPHY

The nameplate face, and the paper’s own

The name keeps the paper’s original nameplate face, Instrument Sans Bold in capitals, so the mark and the headlines speak with one voice. Lora and Plex Mono carry the text and the data.

INSTRUMENT SANS 700, CAPITALS · THE NAME, THE MASTHEAD

CARAT CAPITAL.

INSTRUMENT SANS 600–700 · HEADLINES

De Beers digs 88% more, banks 44% less

LORA 400 · TEXT

Second-quarter rough output jumped 88% to 7.8 million carats even as the average price fell 32% to $105 a carat.

IBM PLEX MONO 500 · DATA, LABELS, THE TAPE

NATURAL 1CT (RAPI PROXY) **3,915.00** −5.1% YTD

MISUSE

Eight things not to do

Each of these breaks either the geometry of the stone or the single red point.

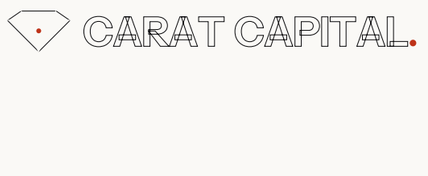

× Don’t stretch or squash it

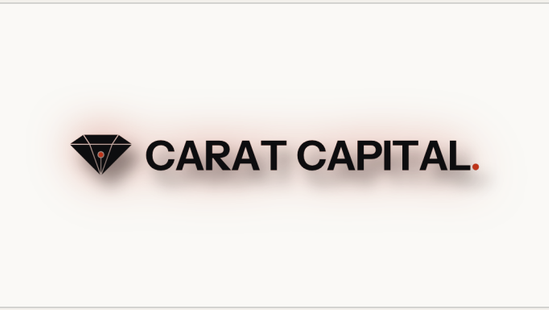

× Don’t recolour the point

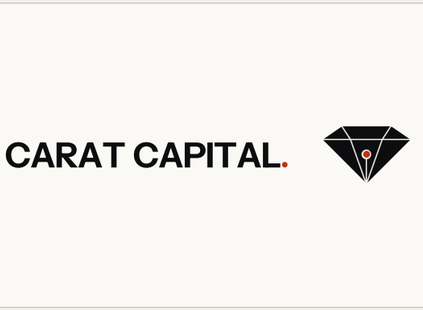

× Don’t rotate it

× Don’t outline it

× Don’t add shadows or glows

× Don’t rearrange the lockup

× Don’t set it on a busy image without a plate

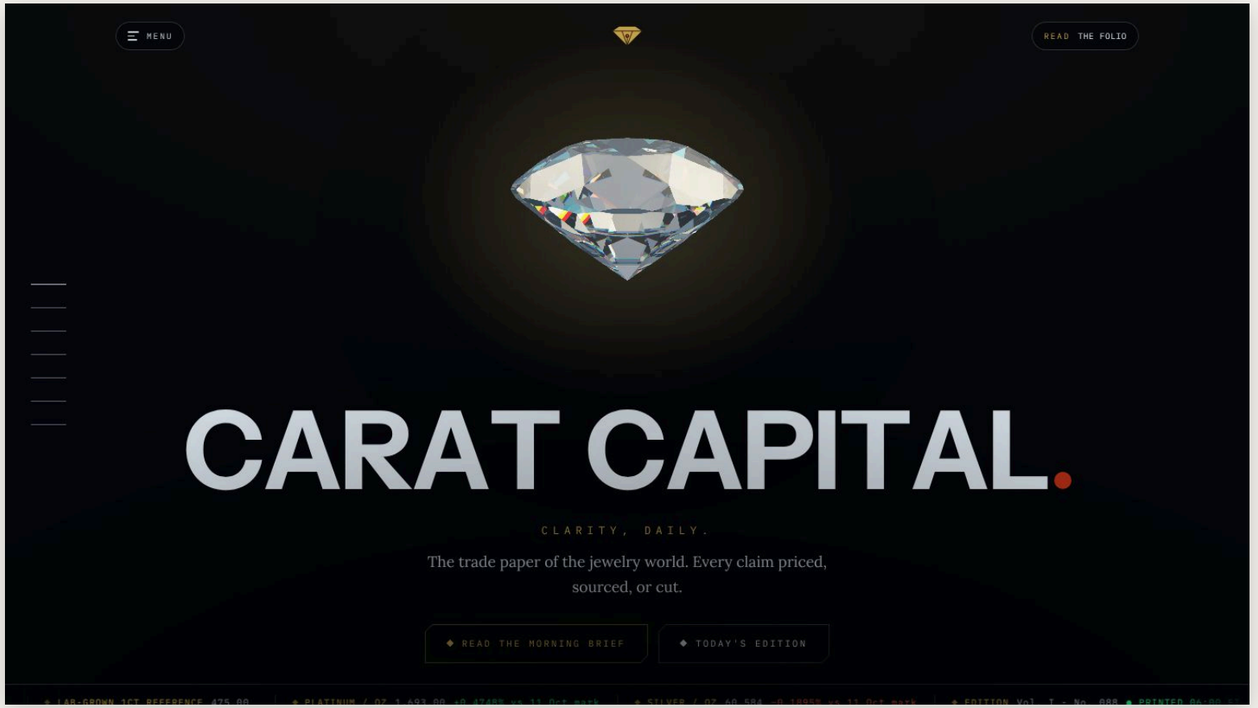

× Don’t bring back the caret

ON THE SITE

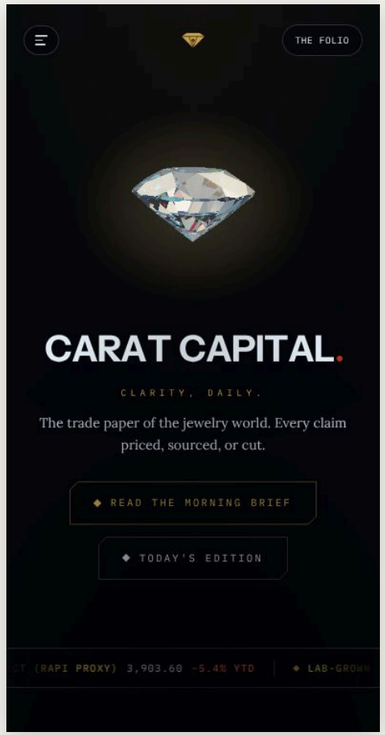

Live on caratcapital.org

The homepage sets the name in the display cut under the rotating brilliant. Every other page carries the S-cut symbol and the name in the text cut in its navigation bar.

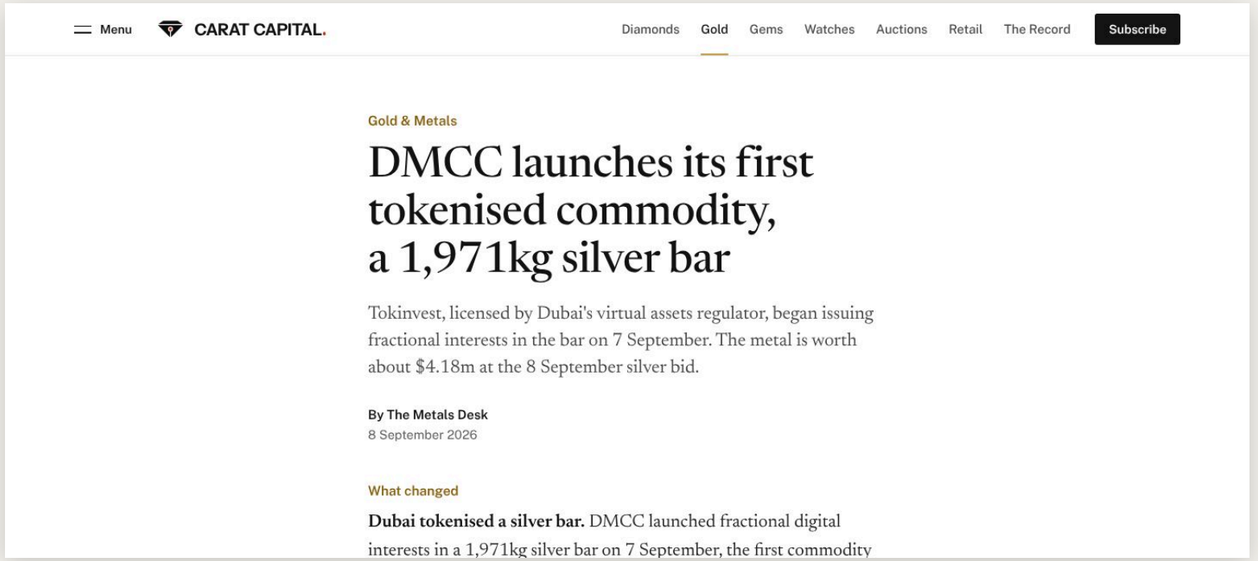

> Rendered from the site's own templates.

FRONT PAGE

PHONE

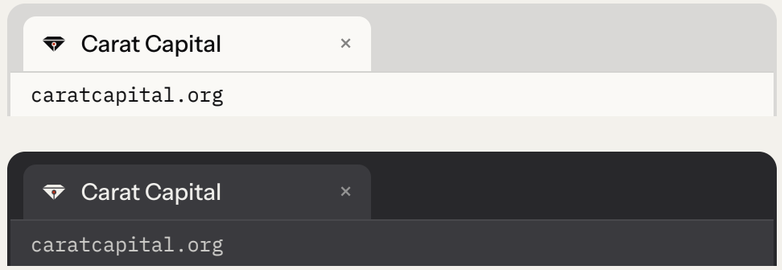

ARTICLE PAGE

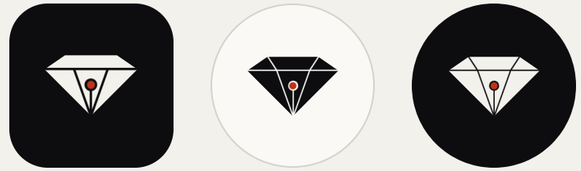

ON SCREENS

Small, and still the stone

The S cut carries the favicon and app bars. Avatars and app icons use the L and M cuts on Black or Pearl White, with the stone at about 62% of the width so circular crops never touch it.

FAVICON, LIGHT AND DARK BROWSERS

APP ICON AND AVATARS

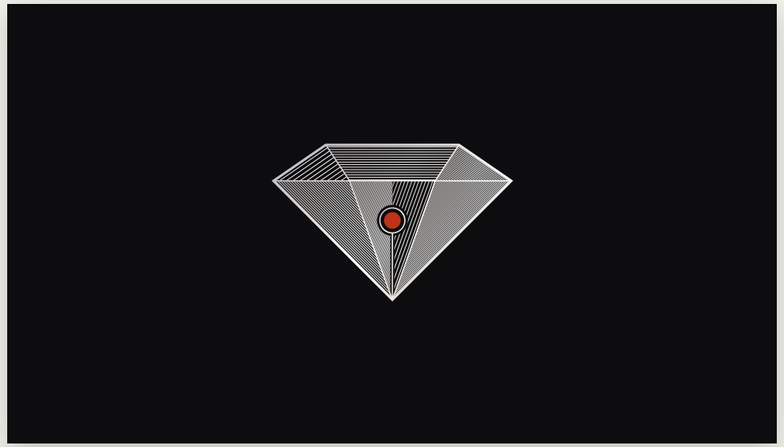

SHARE CARD, 1200 × 630

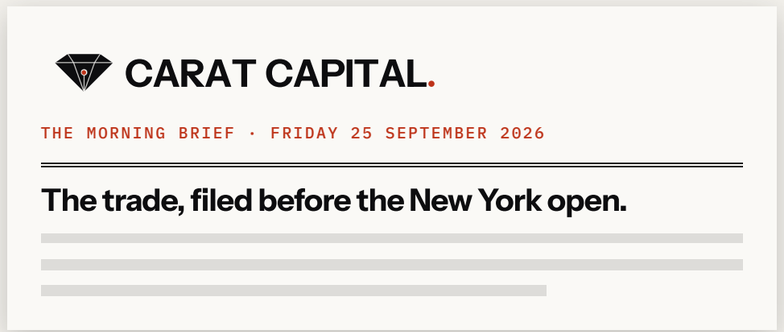

IN PRINT

Cards, letters and the brief

Stationery uses the engraved cut in pearl foil on Black stock, and the lockup in Black on Pearl White stock. The Morning Brief opens with the lockup and a date line in Plex Mono.

BUSINESS CARD, FRONT AND BACK

THE MORNING BRIEF

LETTERHEAD

FILES

Everything in brand/logo

SVG for anything that scales, PNG where a platform asks for pixels. Type is outlined and knockouts are transparent, so every file sits on any background.

> The drawings are generated from `brand/source/point.js`. Change a proportion there and every file, and this book, rebuilds to match.

svg/	Lockups (horizontal, stacked, wordmark) in Black, reverse, pearl foil and one-colour; the symbol in L, M and S cuts, pearl foil and engraved. (Files named `gold` and `paper` keep their names and now carry the pearl lustre and Pearl White.)
png/	Transparent PNGs of the lockups at 2400 px, the symbol at 1024 px, the engraved cut at 2048 px.
favicon/	favicon.svg (switches to Pearl White in dark browsers), favicon.ico (16, 32, 48), apple-touch-icon, 192 and 512 px icons.
social/	Avatars on Pearl White and on Black at 1024 px, and the 1200 × 630 share card.
